### MINT TEA

Savoury fragrance with scents of generously sweet and infused mint tea, created in Grasse.

### OLIVE WOOD

Sensual fragrance with notes of wood, heated by the sun, enhanced by notes of citrus and camphor that bring a touch of freshness, created in Grasse.

La Compagnie de Provence works with local producers based in Provence\* to source raw materials of a rare quality. Always applying the strictest standards, we develop products using natural active ingredients with proven beauty benefits.

For this new collection, La Compagnie de Provence has been quite innovative... The hand and body creams are formulated around a trio of plant oils that are known for their cosmetic properties.

## SWEET ALMOND OIL

Our sweet almond oil is sourced in Provence, from the Valensole plateau. For over a century, the Jaubert family – one of the leaders in almond cultivation – has been maintaining an orchard of over 15,000 almond trees of the Lauranne and Ferragnès varieties. The oil is extracted by cold pressing, then filtered to obtain an oil of the highest quality.

Rich in fatty acids, sweet almond oil helps to soften, moisturise and nourish. Also rich in Vitamins A and E, it is recommended for dry and sensitive skin.

## OLIVE OIL

The olive oil used in our products is sourced at Lançon de Provence in an olive grove of nearly 37 hectares in one of the largest producers of olive oil in France, Château Virant.

This oil is extracted from the typically Provencal olives by the names of Aglandau, Salonenque, Verdale and Grossane, harvested every year between October and December.

Rich in antioxidants polyphenols, fatty acids and vitamins A and E, olive oil is highly protective, nourishing and softening.

## GRAPE SEED OIL

Grape seed oil is extracted from the grape seed by cold pressing. Rich in polyphenols and flavonoids, powerful antioxidants, grape seed oil helps protect the skin from free radicals and premature skin aging. Its high composition in omega-6 gives it moisturizing and restructuring properties. Grape seed oil is suitable for all skin types and helps to maintain the elasticity of the skin.

We strive to promote ancestral know-hows that are the source of our history and that are characteristics of our DNA.

\* Except grape seed oil, origin from France.

## MARSEILLE LIQUID SOAP

Crafted in a cauldron following authentic tradition as its ancestor the original Marseille cube soap, this liquid soap is made from vegetable oil of coconut. Naturally glycerined, it is free of colouring agents, animal fats or synthetic surfactants.
